Weekly Coal Production

Production for Week Ended:
June 19, 1993

Summary

U.S. coal production in the week ended June 19, 1993, as estimated by the Energy Information Administration from railroad car loadings, totaled 19 million short tons. This was slightly higher than in the previous week and slightly lower than in the comparable week in 1992.

Production east of the Mississippi River totaled 11 million short tons, and production west of the Mississippi River totaled 8 million short tons.

The United Mine Workers of America (UMWA) on June 17 further expanded its selective strike against the Nation's leading coal producers. The strike, which has escalated steadily since it began on May 10, currently has idled approximately 12,000 UMWA miners in Illinois, Indiana, West Virginia, Pennsylvania, Ohio, and Kentucky. Collectively, the mines affected by the strike produced about 1.8 million tons of coal per week in 1992.

Figure 1. Coal Production

W

d	52 Weeks Ended			Percent Change
	06/20/92	06/19/93	06/20/92	
	19,832	967,680	996,644	-2.9
	75	3,280	3,504	-6.4
	19,907	970,960	1,000,148	-2.9
